MECHANISMS OF AGEING AND DEVELOPMENT

SUBJECT INDEX

Volume 56 (1990)

- α_1 -Adrenergic receptor, aging, phosphatidyl inositides, phospholipase C, 275
- Adult rats, young growing rats, liver nuclei, intestinal epithelial cell nuclei, chromatin, DNase I, nuclear proteins, 63
- Ageing, cell motility, fibroblasts, time-lapse videomicroscopy, 99
- Ageing, free radicals, cytogenetics, chromosomes, oxidants agents, 107
- Ageing, prefrontal cortex, biogenic amines, monoamine oxidase, 253
- Aging, α_1 -adrenergic receptor, phosphatidyl inositides, phospholipase C, 275
- Aging, antioxidant enzymes, glutathione, peroxidation, radicals, aminotriazole, 281
- Aging, ATPase activities, basolateral membrane vesicles, rat jejunum, 265
- Aging, Fischer 344 rats, kidney, effective renal plasma flow, glomerular filtration rate, 209
- Aging, free radicals, oxyradicals, life span, antioxidants, oxidative stress, 223
- Aging, gonadal steroids, prolactin, pituitary adenomas, mammary tumors, 77
- Aging, hemopoiesis, senescence accelerated mice, stem cells, granulocyte macrophage cells, 89
- Aging, hepatocytes, glycosylation, development, 169
- Aging, immune response, prolactin, pituitary graft, thymus, 11
- Aging, ligaments, biomechanics, medial collateral ligament, sex, 129
- Aging, liver, lysosomal enzymes, dietary restriction, 143
- Aging, mannose-specific receptors, Kupffer cells, endothelial cells, development, 117
- Aging, myosin, creatine kinase, isozymes, senescence, rat, heart, 39
- Aging, myosin, creatine kinase, isozymes, senescence, rat, heart, 23
- Aging, protein-free diet, glutathione S-transferase, hepatocytes, over-shooting, 237
- Aging, transferrin, gene expression, mouse, development, mRNA, 187
- Aging, triosephosphate isomerase, isozymes, oxidation, development, chicken, 179
- Aging, vitamin E, endothelial cells, endothelial barrier function, fatty acid hydroperoxide, atherosclerosis, 1
- Aminotriazole, aging, antioxidant enzymes, glutathione, peroxidation, radicals, 281
- Antioxidants, free radicals, aging, oxyradicals, life span, oxidative stress, 223
- Antioxidant enzymes, aging, glutathione, peroxidation, radicals, aminotriazole, 281
- Atherosclerosis, vitamin E, aging, endothelial cells, endothelial barrier function, fatty acid hydroperoxide, 1
- ATPase activities, aging, basolateral membrane vesicles, rat jejunum, 265
- Basolateral membrane vesicles, aging, ATPase activities, rat jejunum, 265
- Biogenic amines, prefrontal cortex, ageing, monoamine oxidase, 253
- Biomechanics, aging, ligaments, medial collateral ligament, sex, 129
- Bone loss, ovariectomy, parathyroid hormone, 49
- Brain aging, cerebral bioenergetics, electron transfer chain, hopanthenate, oxidative phosphorylation, papaverine, theniloxazine, 155
- Cataractogenic test, diamide, sulphydryl oxidant, water-soluble proteins, lens, 199
- Cell motility, ageing, fibroblasts, time-lapse videomicroscopy, 99
- Cerebral bioenergetics, brain aging, electron transfer chain, hopanthenate, oxidative phosphorylation, papaverine, theniloxazine, 155
- Chicken, triosephosphate isomerase, isozymes, oxidation, development, aging, 179
- Chromatin, young growing rats, adult rats, liver nuclei, intestinal epithelial cell nuclei, DNase I, nuclear proteins, 63
- Chromosomes, free radicals, ageing, cytogenetics, oxidants agents, 107
- Creatine kinase, myosin, isozymes, aging, senescence, rat, heart, 39
- Creatine kinase, myosin, isozymes, aging, senescence, rat, heart, 23

- Cytogenetics, free radicals, ageing, chromosomes, oxidants agents, 107
- Development, hepatocytes, glycosylation, aging, 169
- Development, mannose-specific receptors, Kupffer cells, endothelial cells, aging, 117
- Development, transferrin, gene expression, mouse, aging, mRNA, 187
- Development, triosephosphate isomerase, isozymes, oxidation, aging, chicken, 179
- Diamide, sulphhydryl oxidant, water-soluble proteins, lens, cataractogenic test, 199
- Dietary restriction, liver, lysosomal enzymes, aging, 143 DNase I, young growing rats, adult rats, liver nuclei, intestinal epithelial cell nuclei, chromatin, nuclear proteins, 63
- Effective renal plasma flow, Fischer 344 rats, aging, kidney, glomerular filtration rate, 209
- Electron transfer chain, brain aging, cerebral bioenergetics, hopanthenate, oxidative phosphorylation, papaverine, theniloxazine, 155
- Endothelial barrier function, vitamin E, aging, endothelial cells, fatty acid hydroperoxide, atherosclerosis, 1
- Endothelial cells, mannose-specific receptors, Kupffer cells, development, aging, 117
- Endothelial cells, vitamin E, aging, endothelial barrier function, fatty acid hydroperoxide, atherosclerosis, 1
- Fatty acid hydroperoxide, vitamin E, aging, endothelial cells, endothelial barrier function, atherosclerosis, 1
- Fibroblasts, ageing, cell motility, time-lapse videomicroscopy, 99
- Fischer 344 rats, aging, kidney, effective renal plasma flow, glomerular filtration rate, 209
- Free radicals, ageing, cytogenetics, chromosomes, oxidants agents, 107
- Free radicals, aging, oxyradicals, life span, antioxidants, oxidative stress, 223
- Gene expression, transferrin, mouse, development, aging, mRNA, 187
- Glomerular filtration rate, Fischer 344 rats, aging, kidney, effective renal plasma flow, 209
- Glutathione, aging, antioxidant enzymes, peroxidation, radicals, aminotriazole, 281
- Glutathione S-transferase, protein-free diet, aging, hepatocytes, over-shooting, 237
- Glycosylation, hepatocytes, development, aging, 169
- Gonadal steroids, aging, prolactin, pituitary adenomas, mammary tumors, 77
- Granulocyte macrophage progenitor cells, aging, hemopoiesis, senescence accelerated mice, hemopoietic stem cells, 89
- Heart, myosin, creatine kinase, isozymes, aging, senescence, rat, 23
- Heart, myosin, creatine kinase, isozymes, aging, senescence, rat, 39
- Hemopoiesis, aging, senescence accelerated mice, stem cells, granulocyte macrophage cells, 89
- Hemopoietic stem cells, aging, hemopoiesis, senescence accelerated mice, granulocyte macrophage progenitor cells, 89
- Hepatocytes, glycosylation, development, aging, 169
- Hepatocytes, protein-free diet, glutathione S-transferase, aging, over-shooting, 237
- Hopanthenate, brain aging, cerebral bioenergetics, electron transfer chain, oxidative phosphorylation, papaverine, theniloxazine, 155
- Immune response, aging, prolactin, pituitary graft, thymus, 11
- Intestinal epithelial cell nuclei, young growing rats, adult rats, liver nuclei, chromatin, DNase I, nuclear proteins, 63
- Isozymes, myosin, creatine kinase, aging, senescence, rat, heart, 39
- Isozymes, myosin, creatine kinase, aging, senescence, rat, heart, 23
- Isozymes, triosephosphate isomerase, oxidation, development, aging, chicken, 179
- Kidney, Fischer 344 rats, aging, effective renal plasma flow, glomerular filtration rate, 209
- Kupffer cells, mannose-specific receptors, endothelial cells, development, aging, 117
- Lens, diamide, sulphhydryl oxidant, water-soluble proteins, cataractogenic test, 199
- Life span, free radicals, aging, oxyradicals, antioxidants, oxidative stress, 223
- Ligaments, aging, biomechanics, medial collateral ligament, sex, 129
- Liver, lysosomal enzymes, aging, dietary restriction, 143
- Liver nuclei, young growing rats, adult rats, intestinal epithelial cell nuclei, chromatin, DNase I, nuclear proteins, 63
- Lysosomal enzymes, liver, aging, dietary restriction, 143
- Mammary tumors, aging, gonadal steroids, prolactin, pituitary adenomas, 77
- Mannose-specific receptors, Kupffer cells, endothelial cells, development, aging, 117

- Medial collateral ligament, aging, ligaments, biomechanics, sex, 129
- Monoamine oxidase, prefrontal cortex, biogenic amines, ageing, 253
- Mouse, transferrin, gene expression, development, aging, mRNA, 187
- MRNA, transferrin, gene expression, mouse, development, aging, 187
- Myosin, creatine kinase, isozymes, aging, senescence, rat, heart, 39
- Myosin, creatine kinase, isozymes, aging, senescence, rat, heart, 23
- Nuclear proteins, young growing rats, adult rats, liver nuclei, intestinal epithelial cell nuclei, chromatin, DNase I, 63
- Ovariectomy, bone loss, parathyroid hormone, 49
- Over-shooting, protein-free diet, glutathione *S*-transferase, aging, hepatocytes, 237
- Oxidants agents, free radicals, ageing, cytogenetics, chromosomes, 107
- Oxidation, triosephosphate isomerase, isozymes, development, aging, chicken, 179
- Oxidative phosphorylation, brain aging, cerebral bioenergetics, electron transfer chain, hopanthenate, papaverine, theniloxazine, 155
- Oxidative stress, free radicals, aging, oxyradicals, life span, antioxidants, 223
- Oxyradicals, free radicals, aging, life span, antioxidants, oxidative stress, 223
- Papaverine, brain aging, cerebral bioenergetics, electron transfer chain, hopanthenate, oxidative phosphorylation, theniloxazine, 155
- Parathyroid hormone, ovariectomy, bone loss, 49
- Peroxidation, aging, antioxidant enzymes, glutathione, radicals, aminotriazole, 281
- Phosphatidyl inositides, aging, α_1 -adrenergic receptor, phospholipase C, 275
- Phospholipase C, aging, α_1 -adrenergic receptor, phosphatidyl inositides, 275
- Pituitary adenomas, aging, gonadal steroids, prolactin, mammary tumors, 77
- Pituitary graft, aging, immune response, prolactin, thymus, 11
- Prefrontal cortex, biogenic amines, ageing, monoamine oxidase, 253
- Prolactin, aging, gonadal steroids, pituitary adenomas, mammary tumors, 77
- Prolactin, aging, immune response, pituitary graft, thymus, 11
- Protein-free diet, glutathione *S*-transferase, aging, hepatocytes, over-shooting, 237
- Radicals, aging, antioxidant enzymes, glutathione, peroxidation, aminotriazole, 281
- Rat, myosin, creatine kinase, isozymes, aging, senescence, heart, 23
- Rat, myosin, creatine kinase, isozymes, aging, senescence, heart, 39
- Rat jejunum, aging, ATPase activities, basolateral membrane vesicles, 265
- Senescence, myosin, creatine kinase, isozymes, aging, rat, heart, 39
- Senescence, myosin, creatine kinase, isozymes, aging, rat, heart, 23
- Senescence accelerated mice, aging, hemopoiesis, hemopoietic stem cells, granulocyte macrophage progenitor cells, 89
- Sex, aging, ligaments, biomechanics, medial collateral ligament, 129
- Sulphydryl oxidant, diamide, water-soluble proteins, lens, cataractogenic test, 199
- Theniloxazine, brain aging, cerebral bioenergetics, electron transfer chain, hopanthenate, oxidative phosphorylation, papaverine, 155
- Thymus, aging, immune response, prolactin, pituitary graft, 11
- Time-lapse videomicroscopy, ageing, cell motility, fibroblasts, 99
- Transferrin, gene expression, mouse, development, aging, mRNA, 187
- Triosephosphate isomerase, isozymes, oxidation, development, aging, chicken, 179
- Vitamin E, aging, endothelial cells, endothelial barrier function, fatty acid hydroperoxide, atherosclerosis, 1
- Water-soluble proteins, diamide, sulphydryl oxidant, lens, cataractogenic test, 199
- Young growing rats, adult rats, liver nuclei, intestinal epithelial cell nuclei, chromatin, DNase I, nuclear proteins, 63
